

A Visit to the Dentist with Dr. Morris

The purpose of this picture book is to prepare your child for what will happen during an examination and cleaning appointment with Dr. Morris. By knowing what to expect and having a consistent routine, my hope is that your child will have a successful dental visit.

Note: the outline that follows closely approximates what will occur during your child's visit. Some minor details may be different, however. Therefore, if your child will be adversely affected by minor changes, it may be best not to use this picture book.

Thank you!

Dr. Simon Morris

This is Dr. Morris.

You will sit in a blue chair like this one.

Sometimes the light will be on. You can wear sunglasses if you'd like.

**Dr. Morris will count your
teeth.**

We use a mirror like this to help see in your mouth.

**Next Dr. Morris will check
your teeth to make sure they
are strong.**

Now it's time to brush!

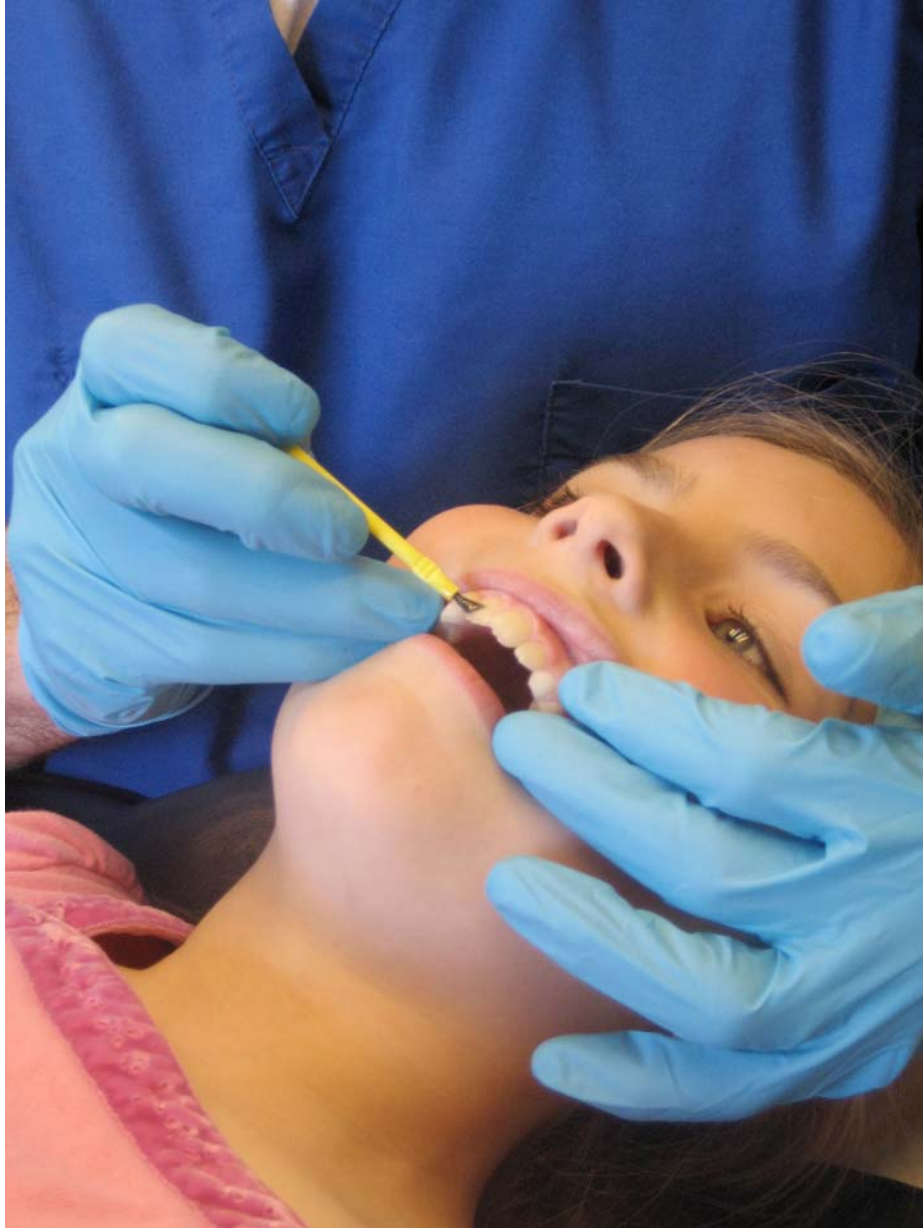

This is an electric toothbrush.

First we will show you how it feels on your hand.

Now we use the electric toothbrush in your mouth.

A little brush is used to place fluoride vitamins on your teeth.

All done! Great job!

Now it's time to choose a toy!
